16. Non-Service & Spam Calls
17. Language Transfer Requests
18. Business Partnership & Vendor Inquiries
19. Corporate Bulk Purchase Inquiries
20. Customer Service Tone & Behavioral Guidelines

1. General Call Handling Framework

Universal Greeting Protocol

"Thank you for calling Brother International. My name is [Agent Name]. How may I assist you today?"

Key Call Handling Rules

- **Empathy First:** Always acknowledge customer concerns before proceeding
- **Clarification:** Obtain complaint number or machine serial number at the start
- **Documentation:** Place customer on brief hold while retrieving/registering details
- **Clear Expectations:** Inform customers about next steps, timeframes, and follow-up
- **Closure:** Always ask if there is anything else to assist with before ending
- **Professional Sign-Off:** Thank them for calling and wish them a great day

Response Time Commitments

- **Technical Support:** Engineer will call within 2 working hours
- **Onsite Visits:** Engineer will call before visit; service within 24-48 working hours
- **Escalations:** Concerned team will review and contact within 24 hours
- **Quotations:** Sent via email or WhatsApp, customer must reply with approval

Call Closure Questions

"Is there anything else I can assist you with today?"

"Thank you for calling Brother International. Have a great day ahead!"

2. Complaint Registration & Logging

Process Overview

Complaint logging is the foundational process for all service requests. Every complaint must be registered with complete customer and machine details before escalation to service centers or engineers.

9-Step Complaint Registration Process

Step 1: Opening & Greeting

"Thank you for calling Brother International. My name is [Agent Name]. How may I assist you today?"

Step 2: Empathy & Assurance

"I'm sorry for the inconvenience. I will surely assist you."

Step 3: Customer Identification

"May I have your name, please?" Then: "May I have the machine serial number?"

Step 4: Machine Details

"May I know when the machine was purchased?"

Step 5: Warranty Verification

"Do you have the invoice copy?"

Step 6: Contact Details

"Please provide your full name, address with PIN, mobile numbers, and email ID."

Step 7: Complaint Registration

"May I place you on hold while I register your details?"

Step 8: Setting Expectations

"Our technical person will call within 2 hours" or "Engineer will visit within 24-48 hours"

Step 9: Call Closure

"Is there anything else I can assist you with?" Then close with thank you

3. Complaint Status Tracking

Status Update Script

"I understand you're calling about your complaint status. May I have your complaint number or machine serial number?"

"Your complaint is currently under process / assigned to engineer / pending for part / resolved."

"Our team is working on your case and will update you shortly."

4. Complaint Reopening

Process

When a customer reports the issue persists after closure: acknowledge immediately, retrieve service history, reopen in system, mark as priority, escalate to service center, and inform customer of 24-hour follow-up.

5. Escalation Handling

When to Escalate

- Complaint pending beyond 48 hours with no update
- Multiple failed engineer visits
- Complaint reopened for same issue
- Customer explicitly requesting escalation

Escalation Script

"I sincerely apologize for the inconvenience. I will escalate this matter to the concerned team for priority action. Our team will review and contact you as soon as possible."

6. Repeat Complaints | 7. Engineer Delays | 8. Warranty Validation

Repeat Complaints: Acknowledge service failure, retrieve history, escalate to senior engineer or alternate service center, consider replacement or compensation.

Engineer Delays: Check assignment status, contact engineer directly, reassign if unavailable, send priority notification to service center manager, provide customer with follow-up timeline.

Warranty Validation: Verify machine serial number, collect purchase date and invoice details. If under warranty: service covered per terms. If out of warranty: service is chargeable with quotation required.

9. Parts Pending Status

"The required spare part is currently under process / awaiting availability. Our team will update you once the part is available. We appreciate your patience."

10. Annual Maintenance Contract (AMC) Support

Brother Policy: Does NOT provide direct AMC. Customers should purchase extended warranty at purchase time. For out-of-warranty machines, authorized service centers provide paid maintenance support.

11. Quotation Request Handling

"For chargeable service, you will receive a quotation on your email or WhatsApp. Once you reply with approval, the engineer will visit. No service proceeds without your written approval."

12. Sales Enquiries

Route to regional sales executive. Provide: Sales executive contact name, phone number, email for quotations, product catalog details.

13. Consumable Products & Accessories

Collect machine model. Provide compatibility details. Route pricing and availability inquiries to sales team or dealers.

14. Audit Calls & Customer Feedback

Proactive outreach after service completion. Verify issue resolution. Collect NPS rating (0-10). Document feedback. Escalate ratings below 5 immediately.

15. Complaints Against Staff/Engineers

Listen without interrupting. Document complaint details with exact quotes. Collect: complaint nature, staff name, date/time, incident details, witnesses. Escalate to Regional Manager and Service Manager. Follow up within 5 business days.

16. Non-Service & Spam Calls

Wrong Number/Non-Service: Apologize, explain they've reached Brother International, suggest they verify and contact correct number.

Spam/Promotional: Politely decline, remind that helpline is for support only, unable to entertain marketing calls.

17. Language Transfer Requests | 18. Business Partnership | 19. Corporate Inquiries

Language Transfer: Arrange callback from language-specific representative. Provide expected timeline.

Business Partnership: Request company profile be sent to customercare@brother.in. Assure that concerned team will review and contact if required.

Corporate Bulk Purchase: Collect company name, location, product requirement, quantity, contact person, contact details. Forward to corporate sales team with bulk inquiry flag. Provide 24-48 hour response estimate.

20. Customer Service Tone & Behavioral Guidelines

Communication Principles

- **Empathy:** Acknowledge concerns, express genuine apologies, avoid robotic responses
- **Clarity:** Use simple language, explain step-by-step, confirm understanding
- **Active Listening:** Let customers speak fully, ask clarifying questions, show patience
- **Solution-Focused:** Focus on what can be done, provide clear next steps, be transparent about timeframes
- **Professionalism:** Use formal address, remain calm, never argue, respect customer's time

Tone DO's

- ✓ Sound warm, human, and genuinely helpful
- ✓ Use positive language ('I will help' vs. 'I can't')
- ✓ Smile while speaking (comes through in voice)
- ✓ Vary tone to show engagement and maintain conversational pace

Handling Difficult Customers

1. Listen without interrupting
2. Acknowledge emotions: 'I understand you're frustrated'
3. Apologize sincerely for the situation
4. Take ownership: 'I will help resolve this'
5. Provide clear action plan and timeline
6. Follow up to ensure satisfaction

Key Behavioral Expectations

- Honor all timeframe commitments; notify immediately if unable to meet
- Know the knowledge base thoroughly; escalate if unsure
- Treat all customers equally with consistency and fairness
- Handle customer information securely and maintain confidentiality
- Represent Brother International with pride, respect, and professionalism

Conclusion & Implementation

This comprehensive knowledge base serves as the operational framework for all Brother International customer support interactions across 20 major call categories and scenarios.

Success Factors

- **Consistency:** Apply same processes and tone across all interactions
- **Empathy:** Lead with understanding and concern for customer issues
- **Clarity:** Ensure customers understand next steps and expectations
- **Follow-Through:** Commit to timelines and always follow up as promised
- **Continuous Improvement:** Learn from feedback and refine processes regularly

This knowledge base is optimized for AI voice agent integration with RAG systems, LLM assistants, and conversational AI platforms while maintaining professional enterprise support standards. All scripts and processes are modular, repeatable, and easily retrievable for real-time agent guidance.
